Igitur, Utrecht Publishing and Archiving Services

Mission:

- supporting Utrecht scientists in electronic publishing
- more general: enhancing scientific communication

Two types of e-publishing support

1. the digital institutional repository of Utrecht University Library
2. other publication platforms such as electronic journals

Igitur publishing activities

Methods

Sample

The Health Service Cost Review Commission (HSCRC) 1997 and 1998 Statewide Inpatient Data in the Public Use Format was used for clinical data. [13][14] All patients discharged from Maryland community hospitals with the diagnosis of heart failure (Diagnostic Related Group 127), over the age of forty-five, who were admitted to the medical service with the primary diagnosis of heart failure were included in the sample. **Table 1** describes the diagnoses that are included in Diagnostic Related Group (DRG) 127- heart failure.

Heart failure was selected because of the prevalence, seriousness, and cost of the disease. As a primary medical diagnosis, heart failure accounted for 725,256 discharges with Medicare charges of over six billion dollars in 1997. [15] Additionally, the mortality rate was high (5.6%) making this diagnosis a high-risk population. [16]

System variables were created from hospital responses to the 1998 American Hospital Association Annual Survey. [17] Of fifty Maryland community hospitals, seven were excluded. Five had missing data on the annual survey. Two hospitals had sample sizes of less than four, indicating that they rarely discharged patients with a diagnosis of heart failure. These hospitals were excluded since low sample size for clusters makes the estimates from regression analysis unstable. This resulted in a final research sample of forty-three community hospitals. To create the integration and differentiation variables eighty-six service variables were extracted.

Confounding variables

Age, gender, race, comorbidity and severity were used to control for client characteristics. The Charlson Index was used to control for comorbidities. [18] Weights for each diagnosis were assigned based on work by Charlson et al. [18] and diagnosis

The key question: how to attract
scientists to our repository?

How to gather (more) content?

1. get support of the University Board
2. publicity
3. just start: good practices, snowball effect
4. collaborate with others (i.e. DARE)
5. make publishing as easy as possible
6. make the benefits clear
7. offer special, attractive services

1. get support of the University Board
- 2. publicity**
3. just start: good practices, snowball effect
4. collaborate with others (i.e. DARE)
5. make publishing as easy as possible
6. make the benefits clear
7. offer special, attractive services

Publicity

- Igitur official launch: symposium 21 november
- further pr: visiting faculties, research institutes etc.
- Adverts, articles in university paper

1. get support of the University Board
2. publicity
- 3. just start: good practices, snowball effect**
4. collaborate with others (i.e. DARE)
5. make publishing as easy as possible
6. make the benefits clear
7. offer special, attractive services

Publishing an article

Igitur offers three possible ways in which to publish a scientific article.

1. in the digital scientific repository of Utrecht
2. in the digital scientific repository and also
3. in one of Igitur's electronic journals

1. Publishing in Utrecht University's digital

Utrecht University's digital scientific repository contains text versions of the publications of Utrecht University.

General information:

- authors rights statement (in development)
- information about copyright policy (in development)
- Publication form

2. Publishing in a specific (Utrecht) scientific

These archives are parts of Utrecht University's digital scientific repository as individual websites or publication sites.

The following websites are available:

- Wiarda: the publication site of the Faculty of Social Sciences

Prodis - Microsoft Internet Explorer

Welkom op de publicatiewebsite van de Faculteit Rechtsgeleerdheid van de Universiteit Utrecht. Deze publicatiewebsite is ontwikkeld door de Universiteitsbibliotheek Utrecht en het G.J. Wiarda Instituut voor Rechtswetenschappelijk Onderzoek.

U vindt hier een groeiende collectie **full text artikelen** van de wetenschappelijk medewerkers van het G.J. Wiarda Instituut. Wij streven naar een kwalitatief hoogstaande publicatiesite, en bieden zo veel mogelijk de recente kernpublicaties aan. Het merendeel is Nederlandstalig (70%) en naast 1 Franstalig artikel is de rest Engelstalig. Mocht u gebreken opmerken, neemt u dan a.u.b. contact op met de **projectleiding**.

Research: **Effects of carotid endarterectomy on cognition and subjective health (CARGO)**. Carotid endarterectomy (CEA) is a surgical procedure to remove atherosclerotic plaque from the inside of one of the carotid arteries. This will improve the blood supply to the brain and reduce the risk of stroke. This longitudinal study, CARGO, evaluates the effects of CEA on cognitive functioning and subjective health. Abstract: Carotid endarterectomy (CEA) is a surgical procedure to remove atherosclerotic plaques from the carotid arteries. The aim is to prevent expected to improve in mental function stenosis of the carotid artery but with weeks before and three months after Cognitive Failures Questionnaire. In a CEA patients were compared to patients to norms. Three months after surgery related scales were noticed to be largely reported everyday cognitive failures. 1 months after surgery, but these reduce the view that both CEA and peripheral

Other services

- reader statistics
- web marketing

There are also some problems...

- copyright issues
- low status of a publication in the repository
- overlap with METIS, Utrecht University's registration system of scientific publications
- what is the added value of publishing in a repository when publications are already registered in PubMed, Web of Science etc.

Thank you for your attention
